

Industry Advisory Council Member Directory 2009

Mission/Purpose:

The ASLMS Industry Advisory Council (IAC) exists for the purpose of providing a mutually beneficial relationship through which ASLMS and laser and related technology companies can work together to increase the value of Society membership, improve patient care by supporting research initiatives, and the clinical application of lasers and related technologies in medicine and surgery.

ASLMS IAC Member companies have made a leadership commitment to work closely with the elected leadership of ASLMS to foster the continued success of the Society, centered upon the continued development and safe use of lasers and related technologies. Continued support by these companies is very important to the success of the Society's research program and we thank and recognize each for their continued commitment to improve patient care.

Membership in the IAC is open to any company whose primary business is directly related to lasers and or related technology. The 2009 membership fee is \$1,000. For more information or to join the council, companies can contact jane@aslms.org.
